

Smart™ Classic Installation

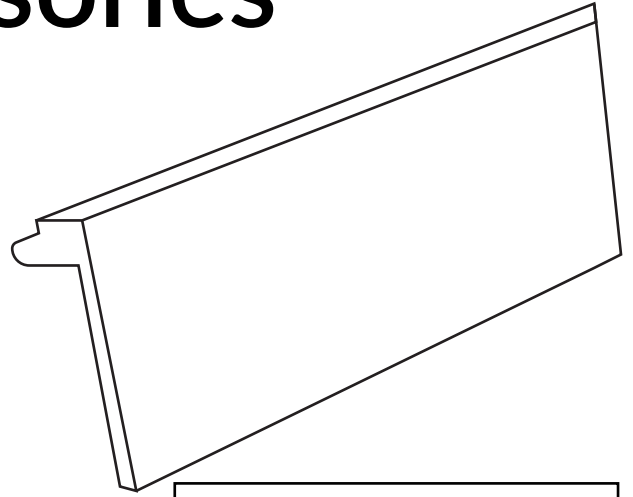

Pre-drilled holes every 25 cm

*Please inspect the product and quantity before starting the construction of your deck.

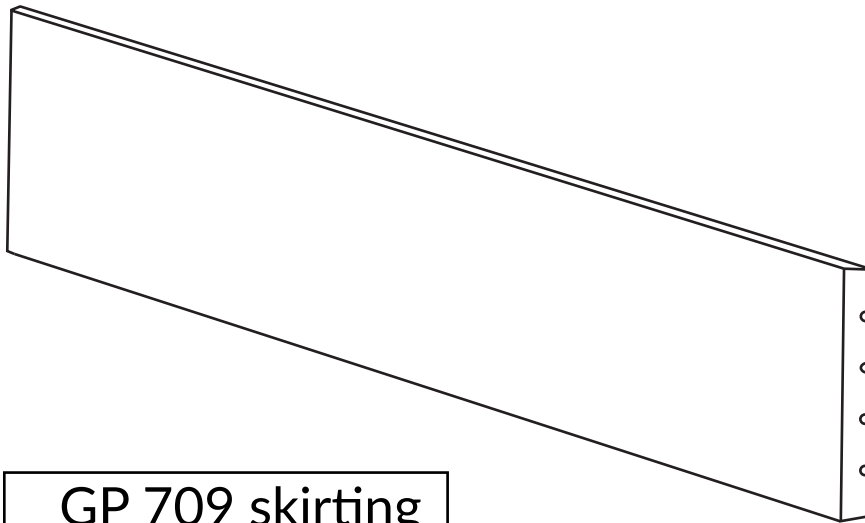

Accessories

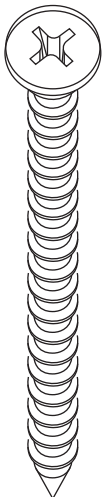

F-list skirting

L-list skirting

GP 709 skirting

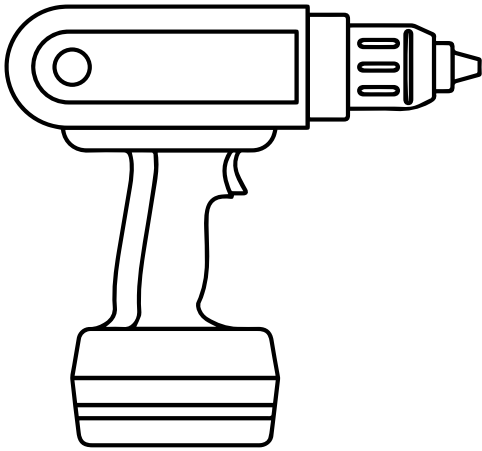

Screw

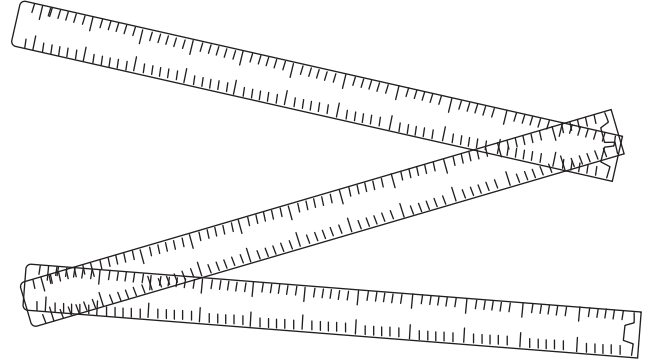

Rubberpad

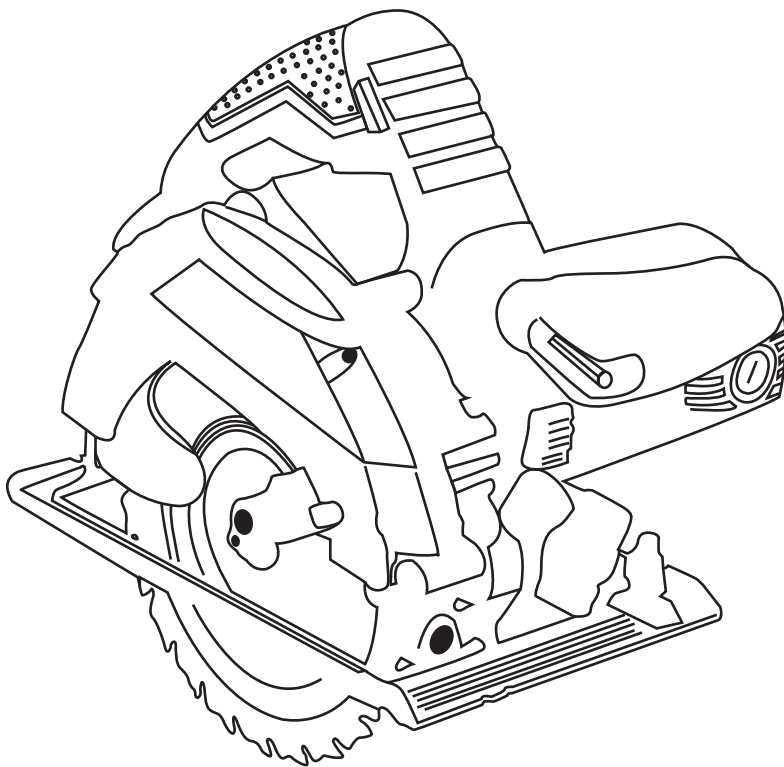

Tools

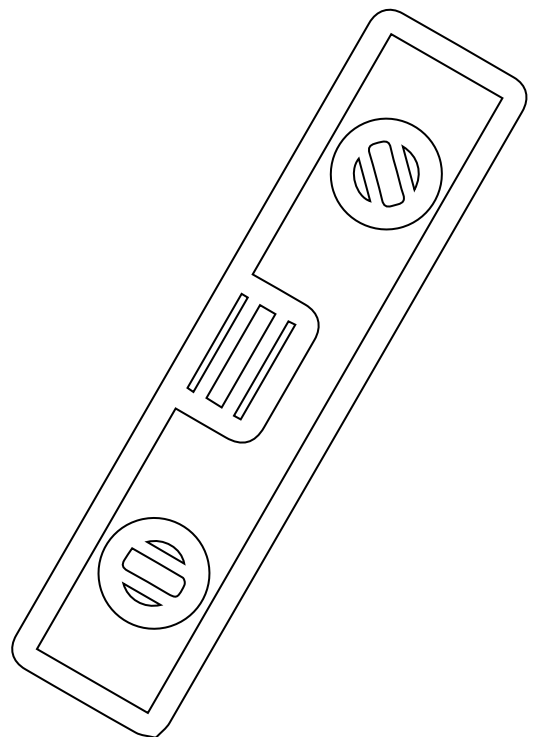

Screw Driver

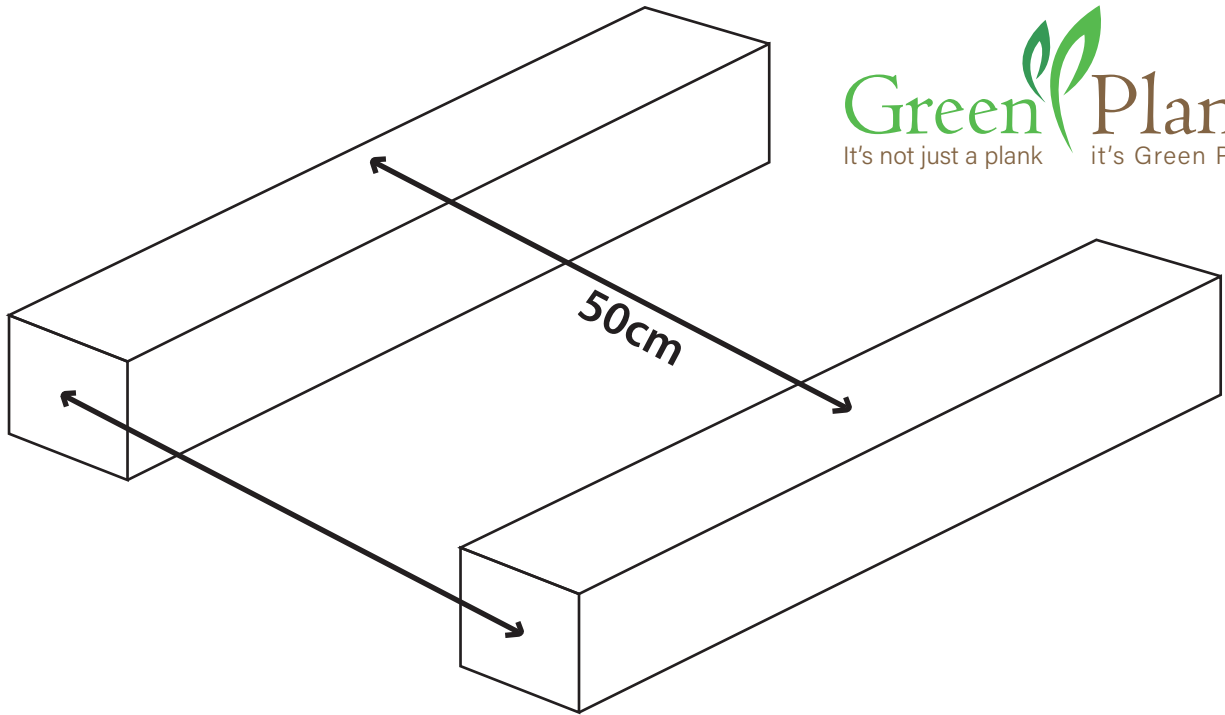

Ruler/Tape Measure

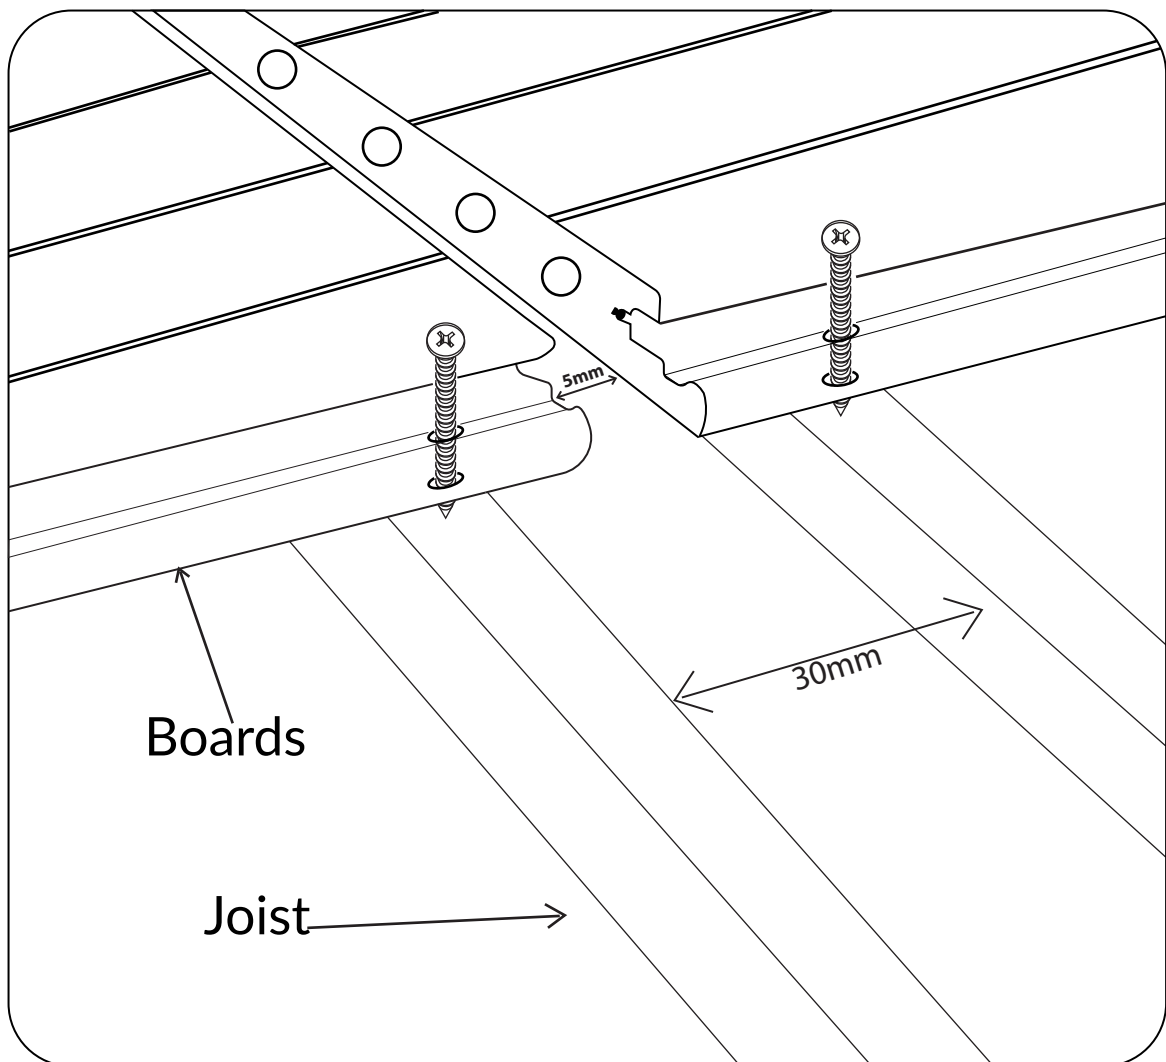

Saw

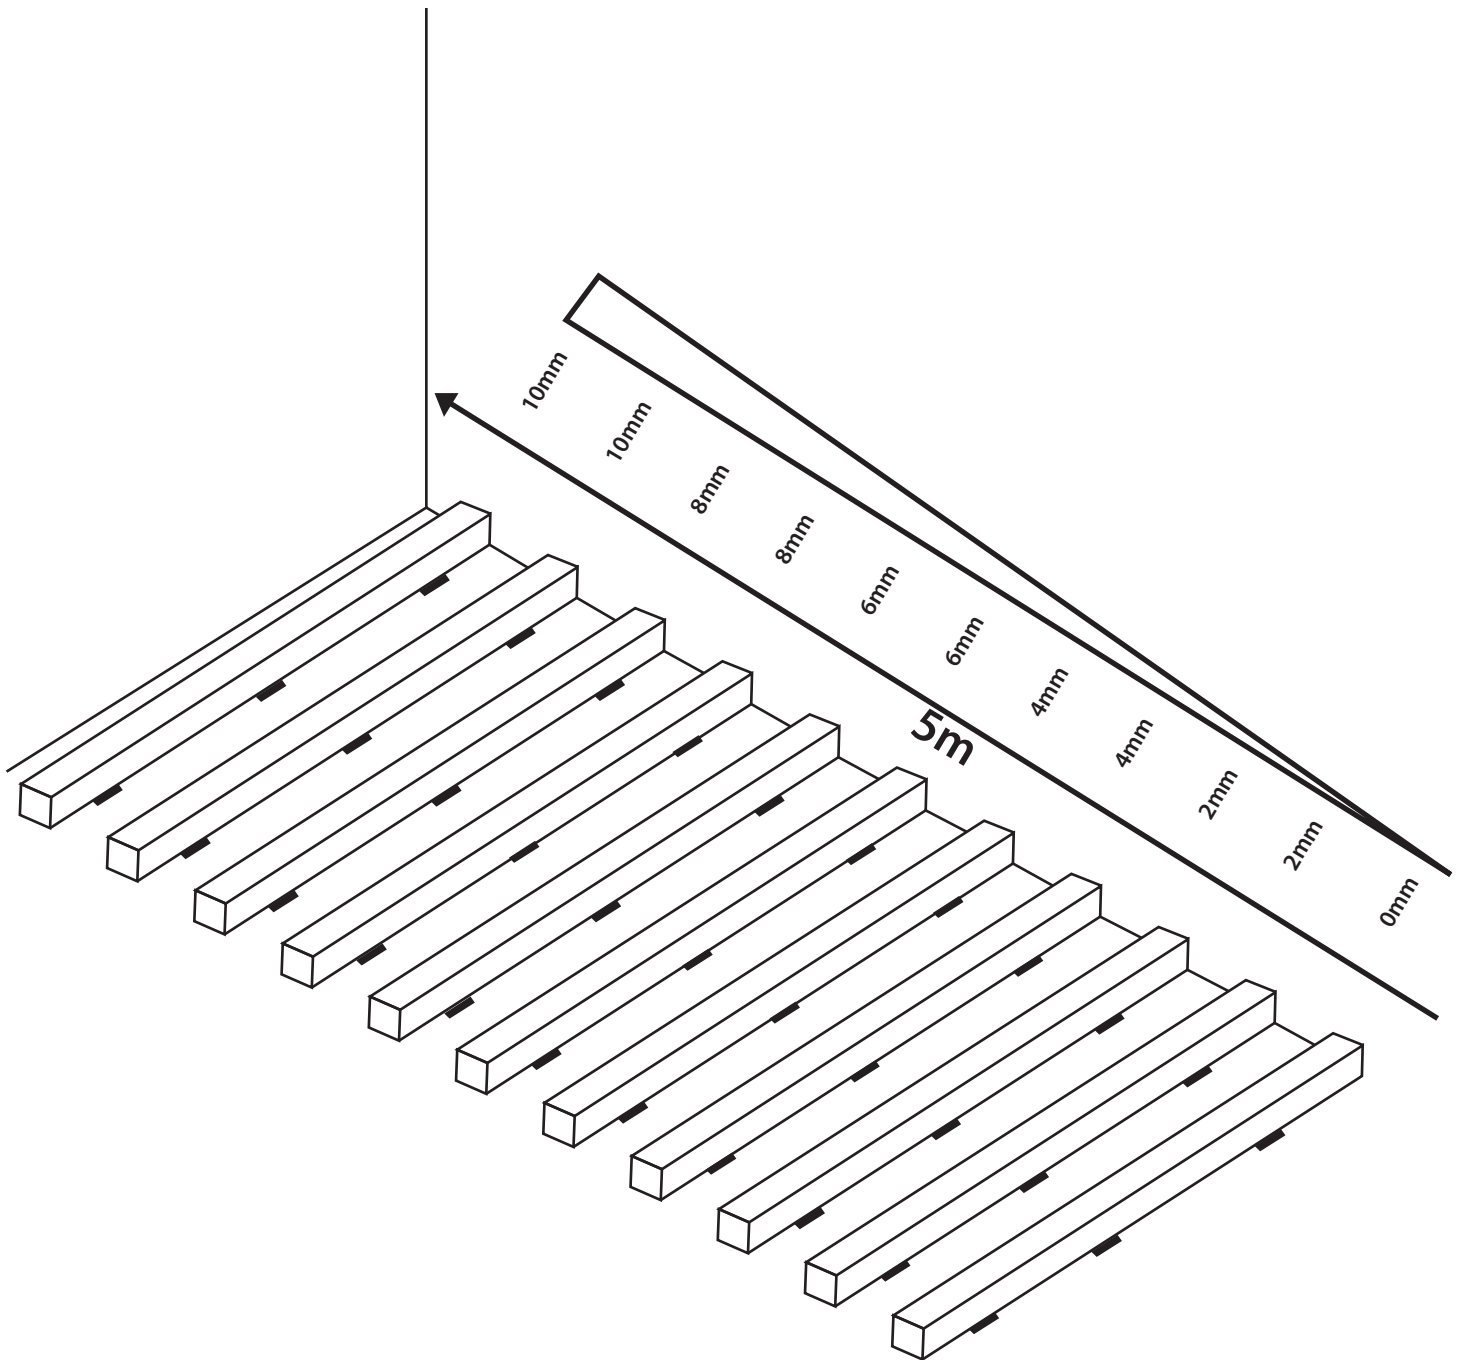

Bubble Level

Joist span (50cm)

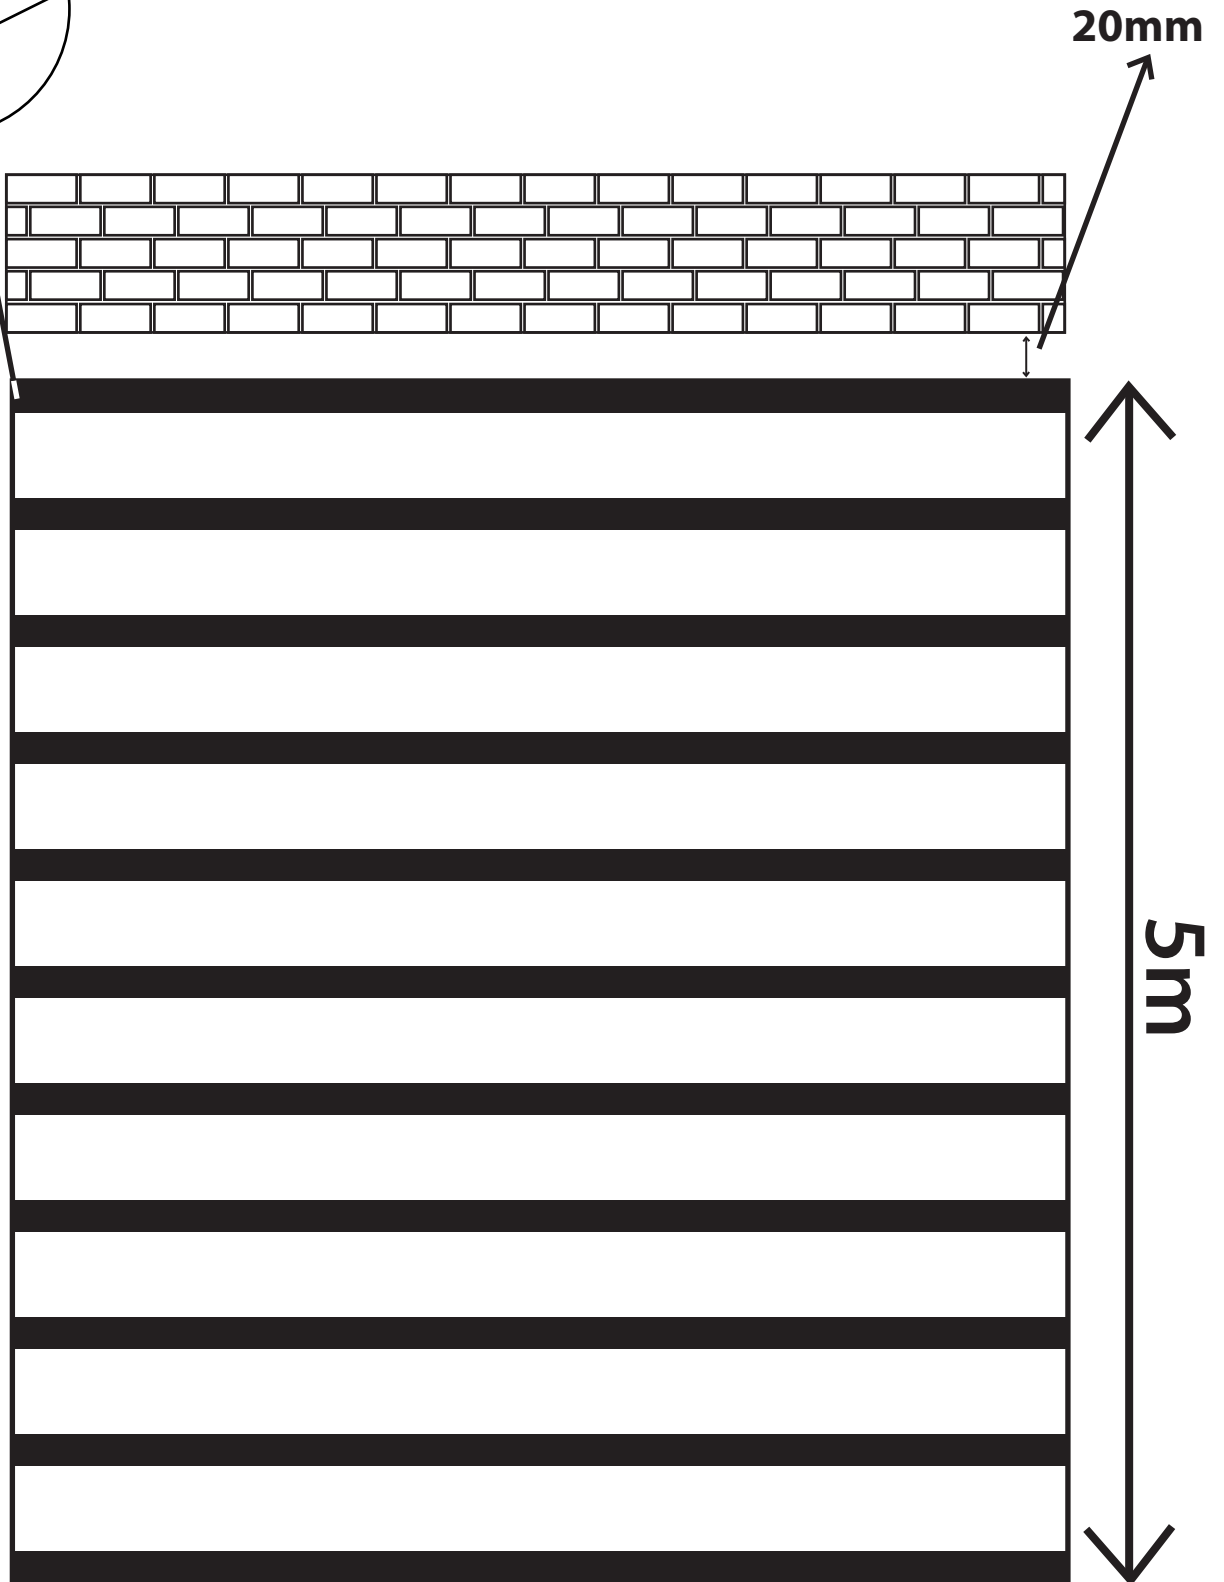

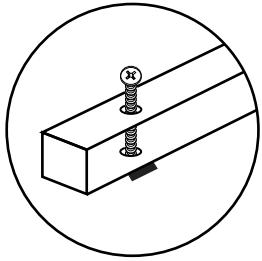

Atleast 5 mm distance between the ends of the boards

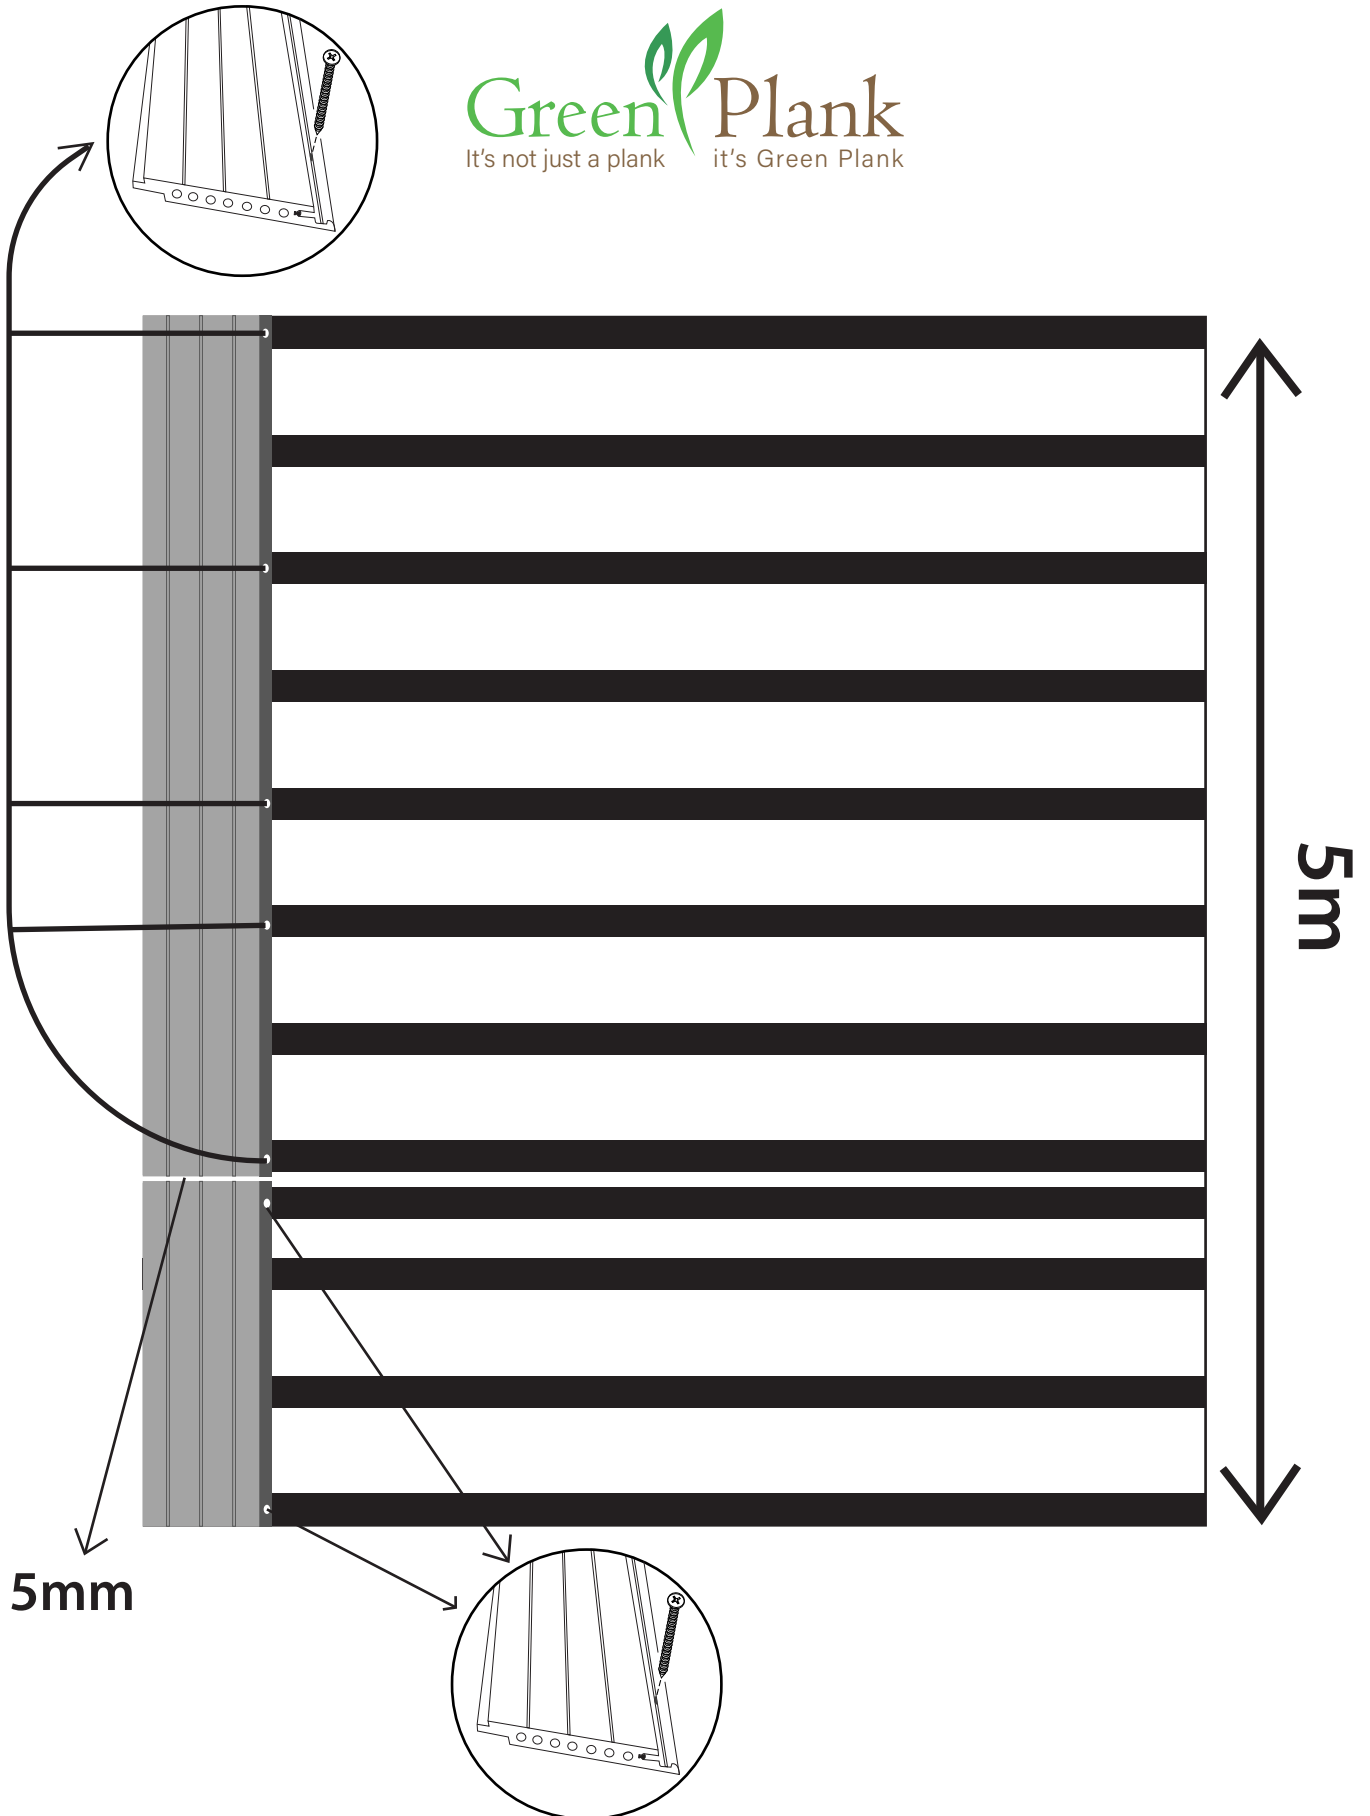

Make slope with Rubber Pads for water drainage

*Construct the deck with a 2mm slope per 1 meter for water drainage.

**You can use either rubber pads or plints to make the slope depending on the desired height of your deck.

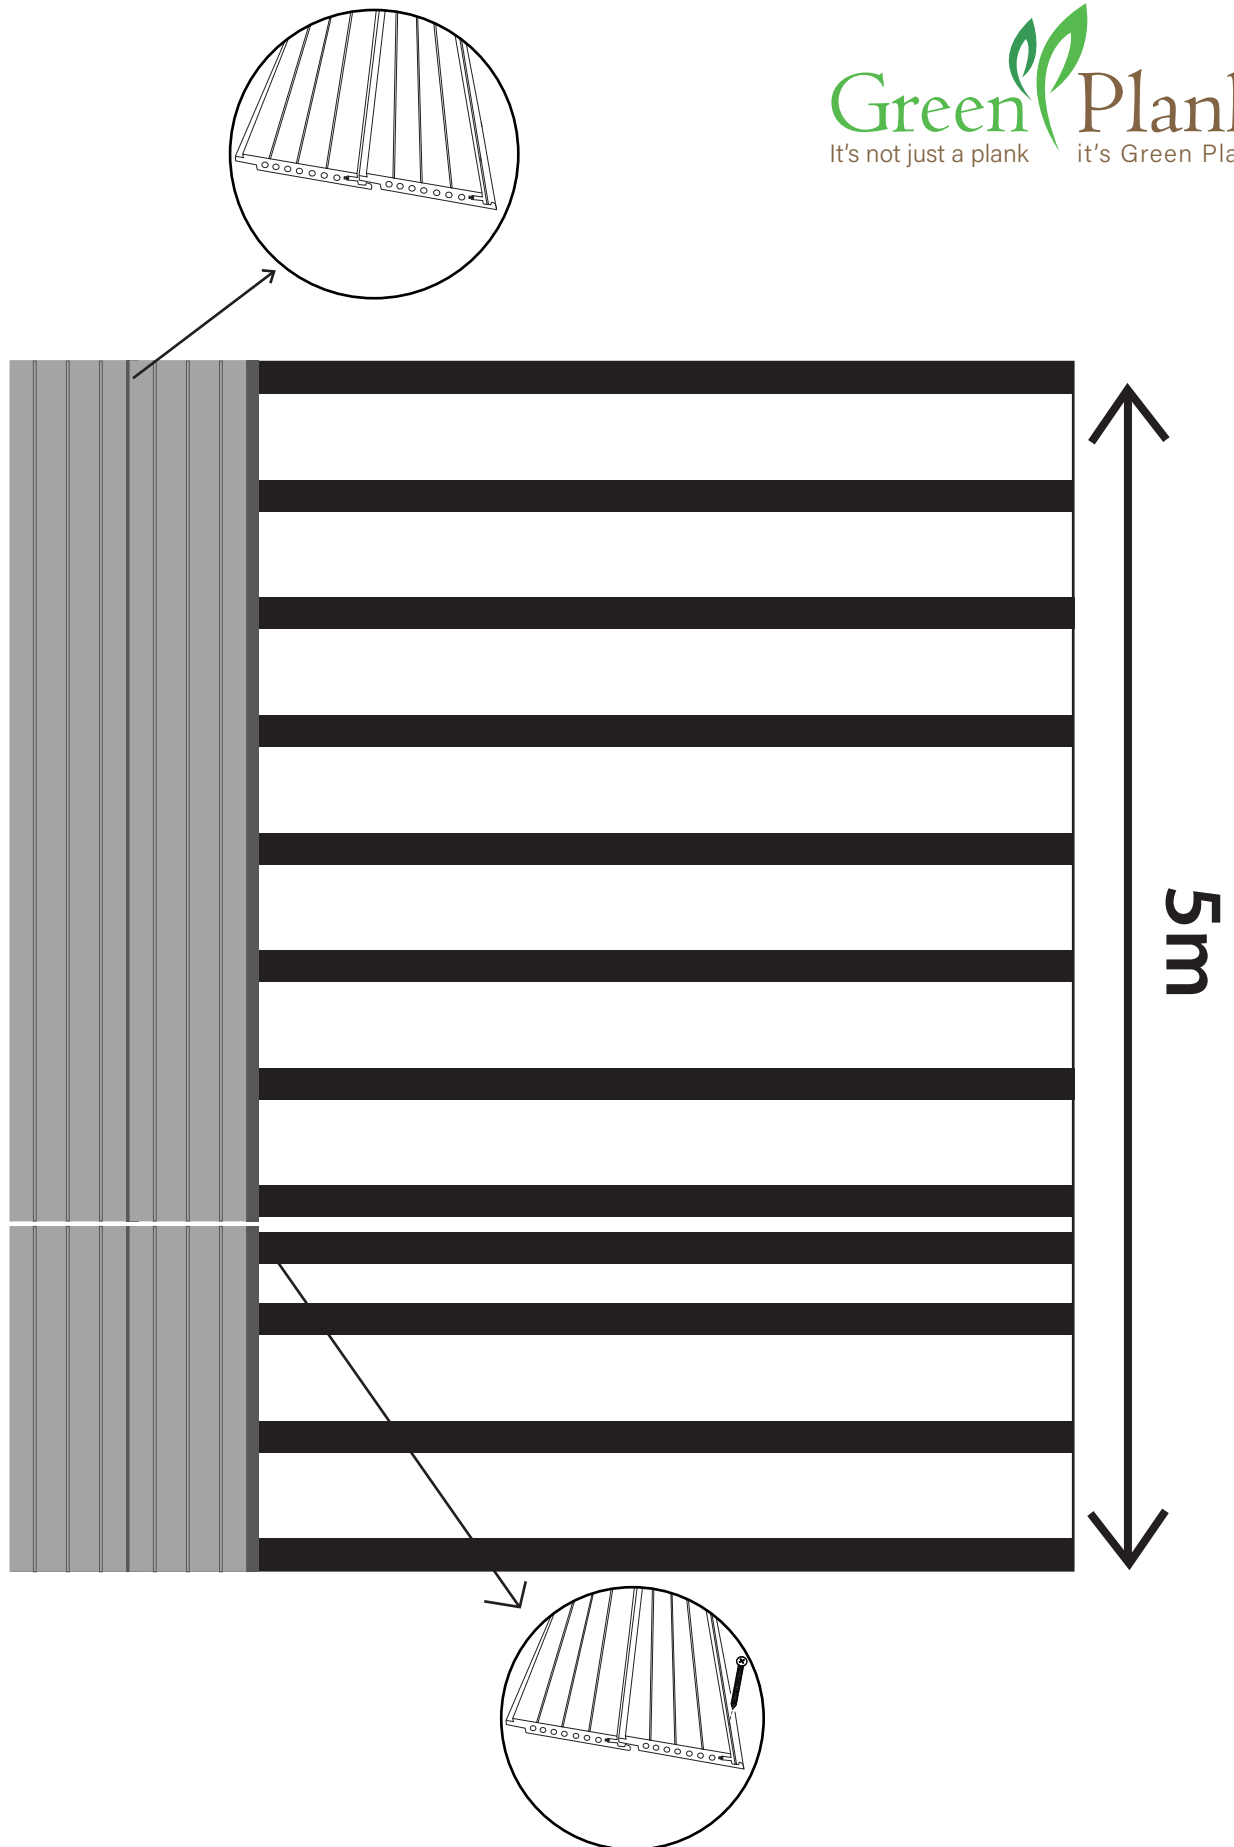

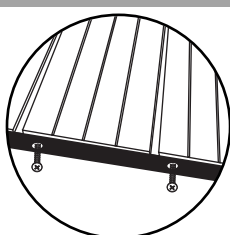

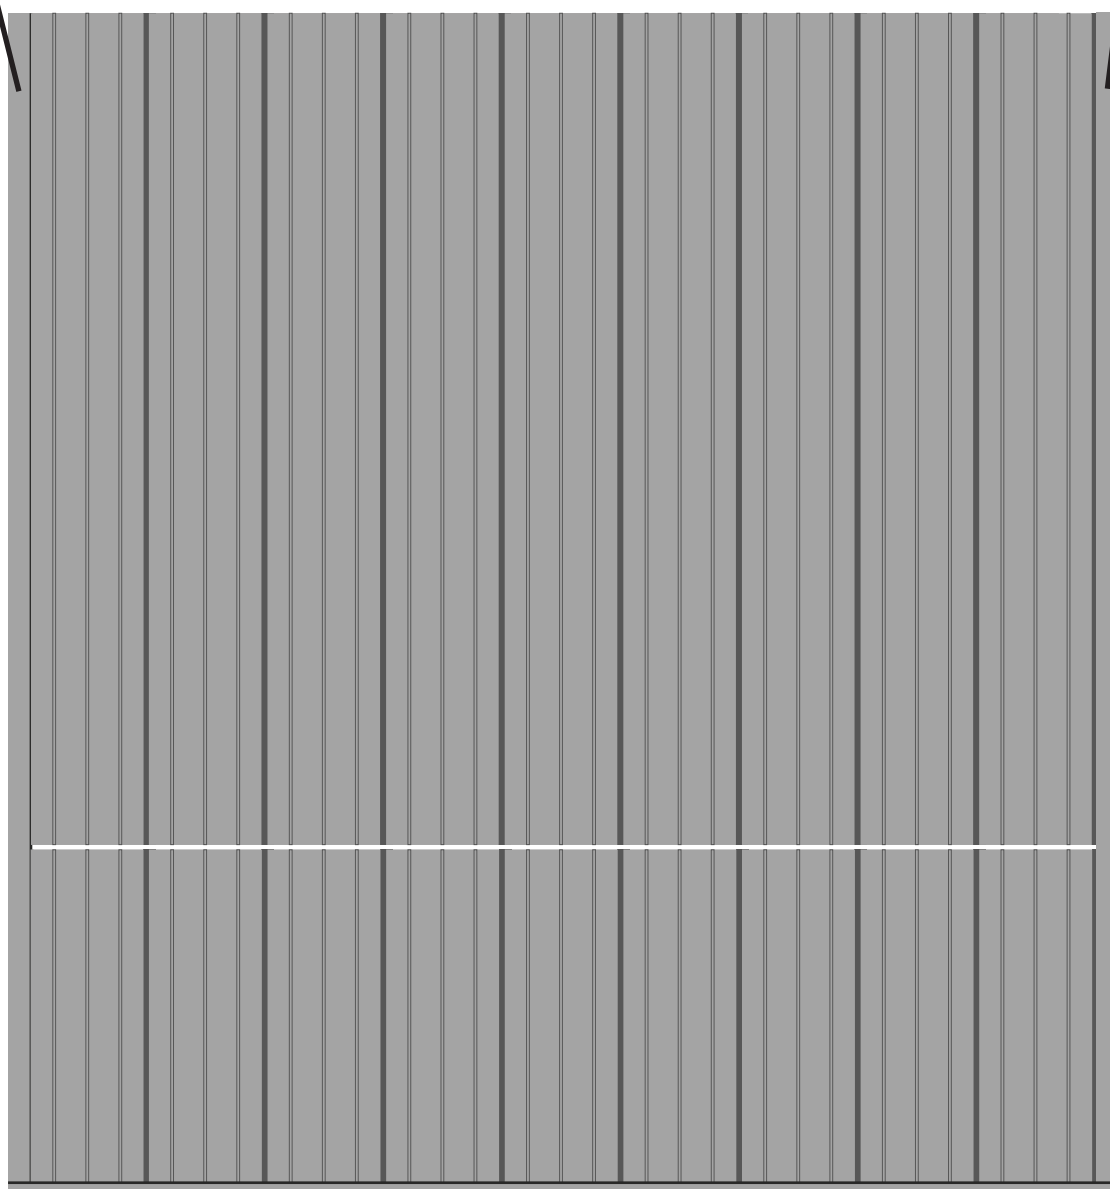

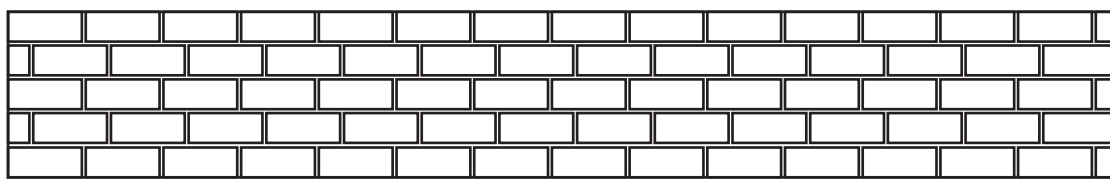

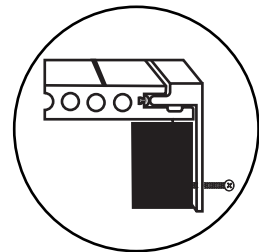

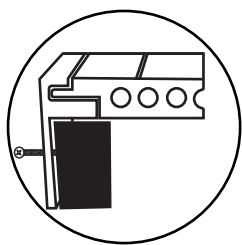

Most important screws are at the
ends and the center

*Please acclimatize the deck for at least 72 hours before construction.

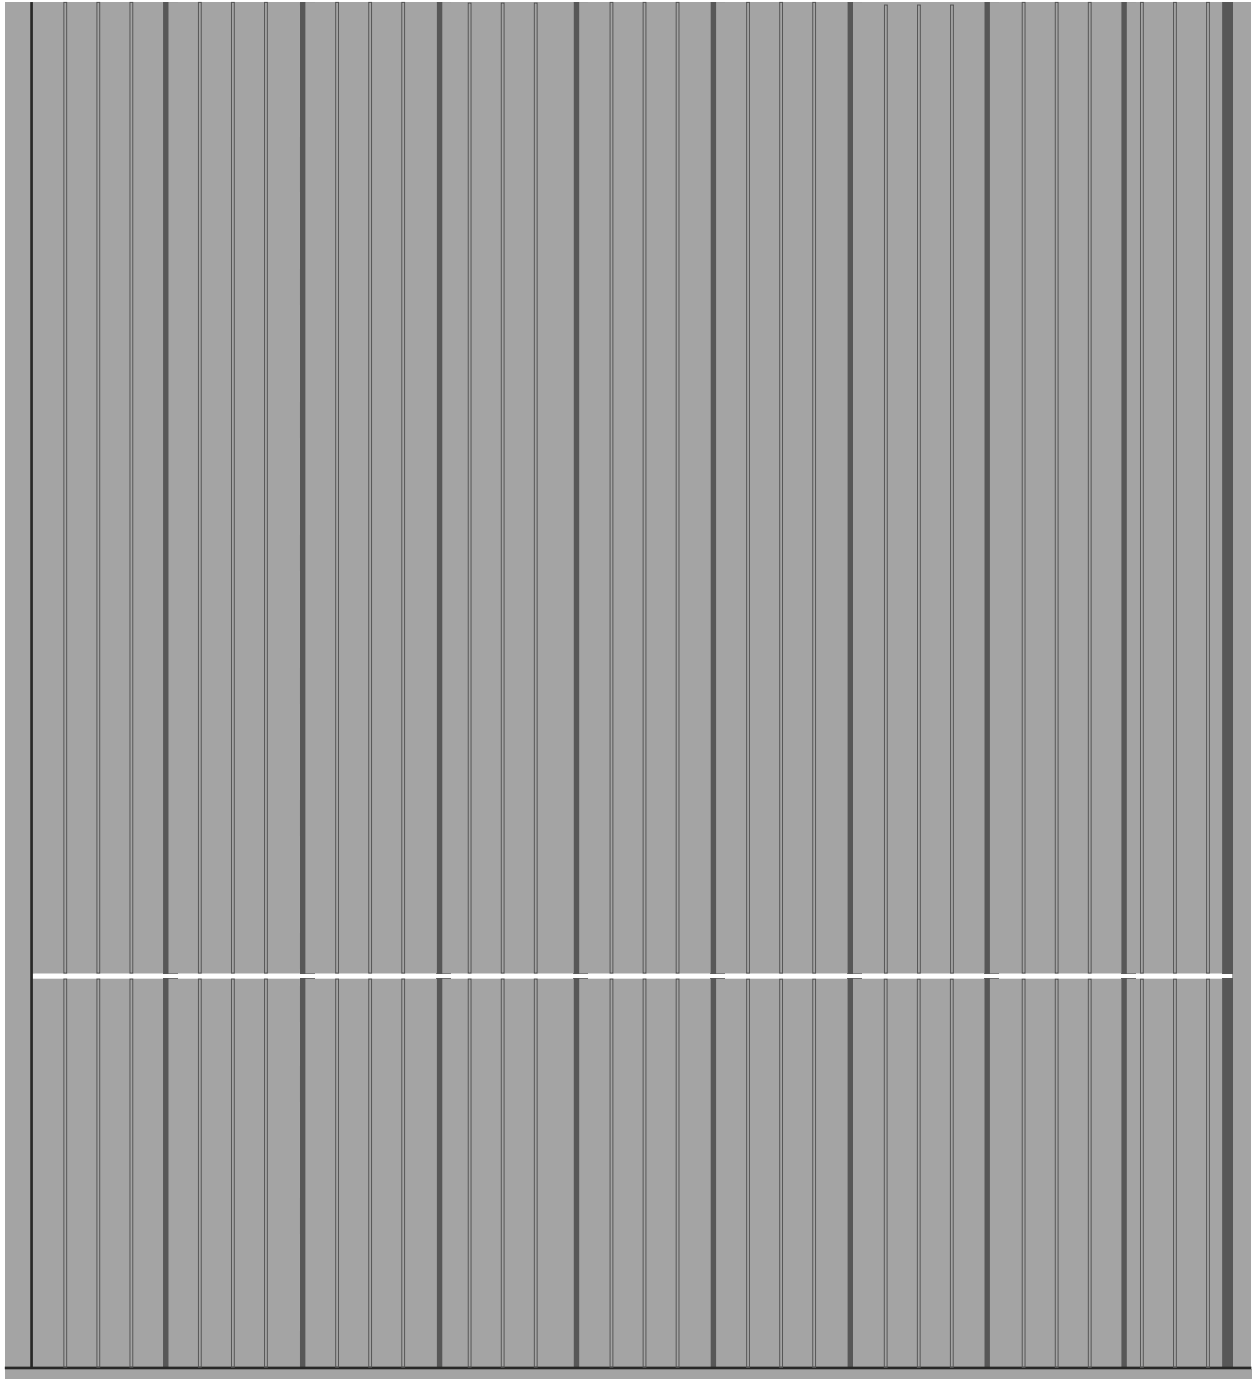

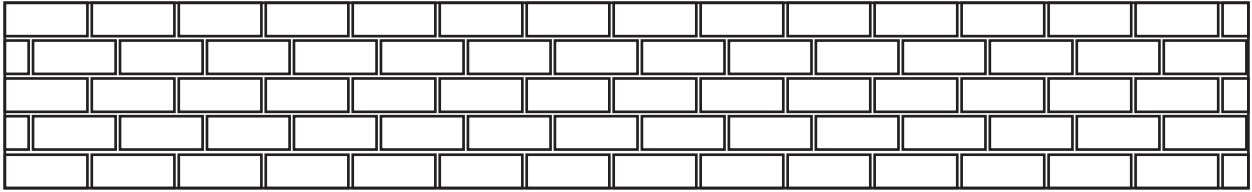

**Make sure to cut all boards at the same temperature to avoid mistakes
