

Green Plank

It's not just a plank it's Green Plank

Green Plank

Green Plank was founded by two brothers as early as 2004. Today, Green Plank has gained a leading position in the composite world. We are an international company, but at heart we are still a family business with family values and a deep respect for our environment, for our children, and for our future.

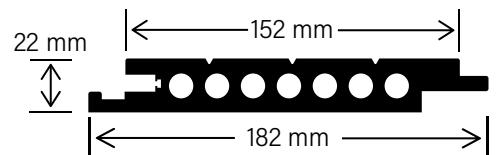

Already in 2002 we started experimenting with different types of bio-waste, in combination with recycled polyethylene plastic to find a sustainable and maintenance-free alternative to natural wood. Along the way we have performed extensive tests and certified our products.

We have extensive technical knowledge and experience in the production of composite materials from concept to completion, which has made it possible for us to get a real competitive advantage.

Smart™ Classic Firesafe

PATENTED

Surface: Slip resistant, ribbed, rich, multi-toned colors

Size: Ca. 22 * 152 mm

Length: Ca. 1,8 m | 2,8 m | 3,8 m

Requirement: Ca. 6,5 Meter for 1 m²

Joist Span: 50 cm c/c för residential applications*

Weight: Ca. 3,67 kg / m

Green Plank Natural Fibers FIRESAFE™ fire retardant Composite Decking
Boards not only withstand the dangers from fire, but also from exposure to the harsh weather, high moisture and other demanding conditions. Green Plank FIRESAFE™ Exterior Fire Retardants Composite Decking has an unmatched record of durability and fire protection.

To earn code acceptance as an exterior fire retardant composite decking material, Our composite decking has passed the required tests by European accredited laboratory to ensure the fire protection is durable.
